## SUMMARY

Ambitious and passionate Frontend Developer with expertise in React / Next js. Proven ability to develop responsive and interactive user interfaces, integrate APIs, and optimize performance for a seamless user experience. Strong self-learner who thrives on new challenges and continuous improvement.

## EDUCATION

### Master of Computer Application ( MCA )

CHANDIGARH UNIVERSITY (PURSUING)

### Bachelor of Computer Application (BCA)

VEER NARMAD SOUTH GUJARAT UNIVERSITY

## TECH SKILLS

**LANGUAGES** : C , C++

**WEB DEVELOPMENT** : HTML , CSS , JAVASCRIPT ,  
BOOTSTRAP , TAILWIND CSS , SASS

**FRAMEWORKS/LIBRARIES** : REACT JS , NEXT JS

**TOOLS & VERSION CONTROL** : GIT, GITHUB

## EXPERIENCE

### 1. REACT JS DEVELOPER || AR Team Solution - Intern

July 2024 - Oct 2024

- Implemented Next.js routing and data fetching mechanisms for seamless navigation and improved user experience.
- Dynamic Task-based To-do List** : Created a dynamic to-do list application using React and Redux for state management, allowing users to add, update, and remove tasks efficiently.
- Key To My Wishes** : Worked on live project key features, including API integration and dynamic page creation for various functionalities.
- Admin-X Theme Integration** : Transformed the Admin-X HTML theme into a fully dynamic React.js application: Dynamic Components & Responsive UI

### 2. FRONTEND / REACT JS || SKILLQODE - INTERNSHIP

Dec 2023 - June 2024

- Developed responsive and interactive user interfaces using React.js, implementing reusable components to enhance scalability.
- Created a wide range of components using Tailwind CSS, ensuring clean and efficient UI design.
- Gained strong proficiency in React's component-based structure and JavaScript ES6, focusing on building maintainable, reusable code.
- Worked with Redux for state management, continuing to enhance skills in handling project architecture and improving state logic.
- Freelancing Project - SN Property** : Designed and developed a real estate website using HTML, CSS, JavaScript, Bootstrap, and Sass, delivering a fully responsive and modern interface.

### 3. EXECUTIVE & WEBSITE OPERATOR || YOGI PROPERTY DEALER

May 2020 - Nov 2022

- Managed property listings and facilitated client interactions, contributing to a 20% increase in sales through effective communication and customer service.
  - Operated and maintained the company's website, ensuring optimal user experience by regularly updating property listings and improving site navigation..
  - Monitored website performance and user feedback, implementing necessary adjustments to improve functionality and user engagement.
- 

## PROJECT

### *SN Property - Real Estate*

- **Tech Stack:** HTML, CSS, JavaScript, Bootstrap, Sass
- **Description:** Developed a dynamic and responsive real estate website that offers users a seamless and intuitive platform for browsing and finding properties. The design is optimized for various devices, ensuring a smooth experience on mobile, tablet, and desktop views.
- **Key Features:** Property listings, interactive search filters, mobile responsiveness.
- **Link :** <https://snpropertys.com>

### *Vivekdev - Personal Portfolio*

- **Tech Stack:** HTML, CSS, JavaScript, React.js + TailWind CSS (in progress)
- **Description:** Currently converting my personal portfolio website to React.js for a more dynamic and efficient architecture. This portfolio showcases my web development skills, projects, and achievements with an emphasis on component-based design for improved scalability and performance. The website is being optimized for responsiveness across multiple devices.
- **Key Features:** Interactive project showcases, responsive layout, component-based architecture in React, improved performance and maintainability.
- **Link :** <https://vivekdev.in>

### *Depot - Inventory Management App (Next.js)*

- **Tech Stack:** HTML, CSS, React.js, Tailwind CSS, Next.js, Redux
- **Description:** Built a modern web application for inventory management with a dynamic and responsive user interface powered by React and Next.js. Integrated a JSON-based static API for data fetching and used Redux for efficient state management to handle inventory browsing and dynamic content.
- **Key Features:** Real-time data fetching with JSON API, inventory browsing, responsive design, API integration for dynamic pages (e.g., shop pages).
